Release Checklist

Use this checklist before every production release of a NooblyJS application.

1. All Jest suites pass and coverage meets the threshold.
2. Playwright smoke tests pass on desktop and mobile.
3. npm audit reports no high or critical vulnerabilities.
4. SESSION_SECRET, SETTINGS_SECRET and API_KEYS are set in the environment.
5. The Docker image builds and /health/ready returns 200.
6. Release notes are written and linked from the knowledge hub.
7. A rollback plan is agreed with the on-call engineer.
